

**PLEASE READ AND EXPLAIN ALL RULES  
AND GUIDELINES TO CHILDREN.**

**It is required that an adult be responsible for supervision of the ball pit.**

**Shoes must be removed before entering the ball pit.**

**No food (especially gum) or drink in or around the pit. This is extremely important to avoid choking.**

**We recommend a group size of six to ten persons (depending on which size of ball pit) in the ball pit at one time. Adult supervisors may use their discretion to increase or decrease this group size pending activities and age of children.**

**When jumping into the ball pit, children should always be aware of other children who may be buried under the balls.**

**It is necessary that children be directed periodically to return all balls to the pit. When outdoors, any balls leaving the enclosure should be promptly returned to the pit.**

**Use of equipment such as trampolines, chairs, tables, etc. to jump into the ball pit is prohibited.**

**When set up outside, it is required that no pools, sprinklers or sandboxes be running simultaneously with the ball pit. This is to ensure cleanliness and hygiene of the ball pit as it may be booked for another party immediately following.**

**Face paints and ball pits do not mix. As one could imagine, inevitably, 3500 out of the 5500 balls will need to be scrubbed individually. The material of the ball pit absorbs the oily base of face paints and can leave a permanent stain.**

**We appreciate your cooperation in following these guidelines as it allows Pit 'O' Balls to continue to provide a clean and safe product for each and every function.**
